

Palak Mallik

Raipur, Chhattisgarh, India | +91-8103799466 | palakmallik0490@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

EDUCATION

MATS University

Master of Computer Applications (MCA)

Raipur, CG

2025 – Present

MATS University

Bachelor of Computer Applications (BCA)

Raipur, CG

2022 – 2025

TECHNICAL SKILLS

Languages: C++, Python, SQL

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), System Design Fundamentals

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, OpenCV, MediaPipe, PyAutoGUI, Imbalanced-learn (SMOTE)

Tools & Platforms: Git, GitHub, MySQL, Power BI, Jupyter Notebook, VS Code, Google Colab, Kaggle

EXPERIENCE

Data Analyst Intern

Jan 2026 – Mar 2026

Infynas Learning Solutions

Raipur, CG

- Cleaned and engineered features on a 1.3M+ record transaction dataset in Python and Pandas, making it reliable enough to train on.
- Iterated on a Random Forest classifier, balancing precision-recall trade-offs to get fraud detection to a dependable place.
- Deployed the model as a live Streamlit app for real-time inference and built Power BI dashboards with custom DAX measures for stakeholder reporting.

PROJECTS

AI-Powered Gesture Presentation Controller | Python, OpenCV, MediaPipe, PyAutoGUI

[GitHub](#)

- Built a touchless slide-control system, using MediaPipe to track 21 hand landmarks per frame and translate gestures into commands.
- Mapped gestures to OS-level actions via PyAutoGUI, adding a confidence threshold and cooldown so the same gesture wasn't triggered twice.

Credit Card Fraud Detection System | Python, Scikit-learn, SMOTE, Streamlit

[GitHub](#)

- Tackled severe class imbalance (under 0.5% fraud) across 1.3M+ transactions using SMOTE, applied only after the train-test split to avoid data leakage.
- Tuned the Random Forest's decision threshold and added a rule-based layer, reaching 71% recall and 85% precision (ROC-AUC above 0.95), then shipped it via Streamlit.

Netflix Content Analytics & Visualization | Python, Pandas, Matplotlib, Seaborn

[GitHub](#)

- Cleaned and analyzed a catalog of 8,800+ Netflix titles to uncover regional and time-based content trends.
- Built 10+ visualizations showing a sharp rise in content volume after 2015 and a shift toward more mature-rated titles.

CODING PROFILES

Problem Solving: Solved 100+ Data Structures & Algorithms (DSA) problems across LeetCode, GeeksforGeeks, and Coding Ninjas (Code360) to strengthen problem-solving skills.

CERTIFICATIONS & ACHIEVEMENTS

Hackathon on Application of Cyber Intelligence for National Security

Mar 2026

Indian Institute of Technology Bhilai (IIT Bhilai), Dept. of CSE – with MeitY, ISEA & IBITF

AI (Artificial Intelligence) Upskilling Program

Feb 2026

Learnet Institute of Skills (LIS), UNDP – supported by Google.org & ADB
